

SOL Innovation Committee
Accountability Subcommittee
Meeting Agenda
January 12 2015, 10:00- 1:00
Monroe Building, Jefferson Conference Room

- Welcome and updates
- The work of our subcommittee: Keeping Focus, Seeking Balance, Using Evidence
- What can we learn from our survey results? (Subcommittee discussion)
- Which purposes of an accountability system do we believe our state accreditation system *must* achieve? (Small groups)
- Breakout groups to address these questions:
 1. Using our discussion about purposes of accreditation as context, what should "fully accredited" be interpreted to mean about a school?
 2. Assume we have an effective measure of student growth, as the Innovation Committee has recommended. This gives us three measures: Student achievement as measured by SOL tests, student growth, and graduation/completion index. Are there any other factors that should be considered in school accreditation if it is to achieve the intended purposes we've discussed?
- Closing, clarification of next steps, exit slips.
